Might end up inefficient and too expensive for the problem it tries to fix
Waterproofs and provides a strong barrier against liquid food.
Acrylic outer casing
Multicoloured LEDs
Suction cups are thick, may ruin the low profile design
green
orange
red
Button
To reset timer every time you change foods
Stick onto the container lid
Suction cups
Cell battery
(underside)
To power the circuit
Programmable microcontroller
(Holds the time and turns LEDs on as the food gets older)
Idea 1
Container Lid
Suction cups OR Extending arms.
Extends to fit the lid size
Most foods already come with a "BBE" date
